## ANTICORROSION LUBE

**ARROCHEM'S Anticorrosion Lube** produces a fixed Anti-Corrosion barrier on metal surfaces, while providing lubrication for any type of metal fabricating application. It imparts superior corrosion resistance over a large range of metal substrates, along with good flexibility and adhesion to the substrate. This versatile lube can be used as a stamping oil, braiding oil, cutting fluid, and drawing oil. This lube employs high strength polyhydrocarbon as the backbone coupled with sulfonic calcium salts to give maximum corrosion resistance. The economic advantage of these products, coupled with the experience of the ARROCHEM staff, provides great benefits to end users because of availability, processing techniques, and assured product quality.

### General Characteristics:

Appearance:	Dark clear Translucent Liquid
Chemical Composition:	Polyhydrocarbon
Solubility in Water, 25°C:	Negligible
Viscosity:	310 SUS (@ 37_C, 1 atm)
Flash Point:	> 200F
Specific Gravity	0.863

### APPLICATION:

Apply LUBE by brushing, dipping, or spraying it onto the surface. Be sure to apply the lube evenly. Anti-Corrosion Coating will bond to the surface quickly, allowing the user to begin other processes.

\*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system.
