## CONVEYOR LUBE

**ARROCHEM'S Conveyor Lube** is a concentrated greaseless lubricant for use on conveyors and chains. This product contains a rust inhibitor, foam suppressant, and a hard-water scale remover for maximum lubricity. In addition, it is formulated with biodegradable components to offer environmental friendliness in a convenient, economical product.

Conveyor Lube offers multiple uses in a single product. It cleans and lubricates chains for longer service life while maximizing performance and productivity. Lube also prevents rust formation with special additives to coat and protect metal surfaces from oxidation. As a result, Conveyor Lube offers safe equipment operation by keeping parts functional and extending equipment service life. Production downtime is minimized by reducing the likelihood of chain or equipment failure.

### General Characteristics:

Appearance:	Amber Colored Liquid
Solubility in Water, 25C:	Soluble
Chemical Composition:	Alkaline Detergent
pH, 1% solution:	10 ± 0.5
Foaming Nature:	Controlled
Viscosity:	100 cps maximum (25C, 1 atm)

### APPLICATION:

Conveyor Lube is designed for use in all types of application equipment (drip, orifice, electronic, proportioners, and other metering equipment) to deliver maximum lubricity

and cleaning at a dilution of one-part lubricant to 75 to 125 parts water. Adjust use level to provide desired lubricity for local conditions. Used by dairies, bottling plants, breweries, and food packaging facilities, Conveyor Lube is applicable for both bottle and floor case chains.

\*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system.
