CRIGEL BLUE POWER STRIPPER

Surface Stripper

ARROCHEM'S Crigel Blue Power Stripper is a high-tech, solvent based gel stripper. It is designed to strip paints, acrylic coatings, alkyd-based coatings and some urethane coatings. It is not recommended for removing epoxy coatings. Crigel Blue contains no methylene chloride, therefore it evaporates much more slowly than other strippers, meaning the job will require less product, which saves money. The product is a high viscosity gel which enables it to adhere to vertical surfaces. Since Crigel Blue contains no methylene chloride, it can be used indoors with no toxic fumes.

General Characteristics:

Appearance:	Blue Gel
Chemical Composition:	solvent/acid
Ionic Nature:	Nonionic
Solubility in Water, 25°C	Soluble
PH, as supplied:	2
Wetting:	Excellent
Foaming Nature:	Low Foam
Phosphate Content:	None
Viscosity:	100 cps (25C, 1 atm)

Application:

Spray or brush solution undiluted onto part to be cleaned. Wait until material softens and either pressure wash or wipe off with wire brush. Stripping capacity depends on thickness of coating and characteristics of coating. Additional applications could be required.
