MOLD RELEASE LUBRICANT

OIL BASED

ARROCHEM'S Mold Release is a hydrocarbon blend developed to assist in applications where high lubricity is needed. Mold Release also contains a special additive to enhance the product's ability to remain on the substrate for mold release applications. It is insoluble in water and contains no chlorinated solvents or other hazardous ingredients.

General Characteristics:

Appearance:	Clear Liquid
Chemical Composition:	Hydrocarbon Blend
Ionic Nature:	Nonionic
Solubility in Water, 25C:	Insoluble
Specific Gravity:	0.959 g/mL

APPLICATION:

Apply Mold Release by spraying or brushing onto the mold. A light, consistent film across the mold is sufficient for most applications. Reapply, as necessary. Mold Release may be removed from the surface as necessary using a solvent based cleaner such as ArroChem's TechSolv or ArroChem's Low Odor Concentrate.

*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system.
