## **PARTS WASHER POWDER**

### **POWDERED PARTS CLEANER**

ARROCHEM'S PARTS WASHER POWDER has been specifically developed for use in parts washers to facilitate in the removal of various types of dirt, grease, and foreign matter from carbon and stainless steel. Parts Washer Powder is a low foaming, non-caustic cleaner. It contains a vapor phase and solid phase rust inhibitor to help protect metal from flash rusting. Parts Washer Powder also contains a high-tech rinse aid to help prevent the white powder residue that is often left behind from conventional parts washer cleaners. It is economical to use since it comes in a 100% active powder. Parts Washer Powder is a concentrated formula which allows the user to determine the necessary strength for effective cleaning.

#### **General Characteristics:**

Chemical Composition:	Sodium Salt Blend
Ionic Nature:	Anionic/Nonionic Blend
Appearance:	Greenish Powder
Solubility in Water, 25°C:	Dispersible
pH, 1% solution:	11.5
Wetting:	Rapid
Foaming Nature:	Low

#### **Application:**

Parts Washer Powder is recommended for normal usage at dilutions of 4 oz. (one packet) with warm or hot water to make a five-gallon solution. Product can be concentrated for tough cleaning, if necessary, at double strength. Powder should be mixed thoroughly until dissolved. Hot water washers will accelerate the cleaning power of Parts Washer Powder.

\*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions.
