SYNTHETIC CUTTING FLUID

ARROCHEM'S Synthetic Cutting Fluid is specifically designed to facilitate excellent anti-wear, high-pressure and lubricity properties on different metal surfaces to extend the life of the cutting or drilling equipment. The anti-corrosion additives in the fluid prevent any degradation of the metal by corrosion. Special anti-wear additives extend the life of the metals by reinforcing the metal and preventing it from wearing out. It is non-chlorinated, non-Sulfur based, and does not contain any oils. It is non-hazardous, non-combustible, and easy on operator's skin. It does not micro-mist and create oil fog in plants. It also has an anti-bacterial additive to prevent any bacterial growth.

General Characteristics:

Appearance:	Clear Liquid
Chemical Composition:	Polyoxypropanylamide
Solubility in Water, 25°C:	Dispersible
Foam Activity	Low Foam

APPLICATION:

Recommended dilution varies depending on the type of metal, the thickness of the metal and the processing equipment.

*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system.
