BRAKE CLEANER CLEANER AND DEGREASER WATER-BASED LUBRICANT

ARROCHEM'S Brake Cleaner is specifically designed to facilitate in the rapid removal of oils, waxes, greases, tars, gums, fats, and resins from braking systems or other process equipment surfaces. It can be applied for superior cleaning at ambient temperature without the need for heating of product or applied area. Application of Brake Cleaner may be through brushing, soaking, spraying, or wiping. Product proves especially effective on most types of surfaces and will not cause surface corrosion or warping of O-rings or polymer parts. Brake Cleaner does not contain any chlorinated solvents such as perchloroethylene or methylene chloride and is based on environmentally friendly short chain alkanes.

General

Appearance:	Colorless Clear Fluid
Chemical Composition:	Aliphatic Carbon Compound
Solubility in Water, 25C:	Less than 0.1mg/L
pH, 1% solution:	Not Applicable (Essentially Insoluble)
Foaming Nature:	None
Phosphate Content:	None
Viscosity:	10-30 cps (25C, 1 atm)

Application:

Brake Cleaner can be sprayed, wiped, or brushed onto surface for removal of grease and foreign matter from steel, aluminum, cast, or plastic materials. It contains no water and is considered a flammable liquid, so good industrial practices should be used. For removal and rinsing, a second application of Brake Cleaner to flush surface free of soils, followed by air-drying, should be sufficient for effective cleaning. Brake Cleaner is removes brake dust and grease from braking parts and dries within a few minutes.
