## ENVIROWASH

### UV FLEXO INK CLEANER

**ARROCHEM'S EnviroWash UV Flexo Cleaner** is specifically designed to clean water-based, soy-based, and UV flexo inks from printing rollers, plates, and other printing equipment. It is a low VOC wash designed to improve safety in the pressroom. It does not contain any VOC's, HAP's, TAP's, SARA 313 reportable chemicals, or photochemically reactive chemicals according to 40 CFR 51.100, the North Carolina Photochemically Reactive Organic Compounds list, the North Carolina Pollutants list, and UNCC Environmental Assistance for Small Businesses. Since EnviroWash does not swell most types of rubber, it is an excellent choice for use on both anilox and rubber rollers. Cleaner is dilutable with water allowing the user to determine the necessary strength for their application.

#### General Characteristics:

Appearance:	Colorless Clear Fluid
Chemical Composition:	Water Based Cleaner
Solubility in Water, 25C:	Infinitely Soluble
Odor:	Low
pH, 1% solution:	7.0 + 0.5
Foaming Nature:	None
VOC's:	0%
HAP's:	0%
TAP's:	0%
SARA 313 reportable:	0%

## Application

For manual application, apply EnviroWash with a rag or squirt bottle onto the equipment that needs cleaning. For rollers, allow rollers to turn to provide quicker evaporation of EnviroWash.

\*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system
