## DECK STRIPPER AND CLEANER

ArroChem's Deck Stripper and Cleaner is an extremely aggressive caustic stripper formulated to strip water, stains, varnishes and oil-based paints from decks, exterior wood surfaces and wood plastic composite surfaces.

### General Characteristics:

Appearance:	Clear Colorless Liquid
Chemical Composition:	Caustic Surfactant Blend
Solubility in Water:	Readily Soluble
Lbs. / Gal.	9.89
pH:	12.5 – 13.5
Foaming Nature	Low Foam

### Application

For best results, apply ArroChem's DS&C when the outdoor temperature is between 65°F and 90°F. Dampen the surface desired to be stripped with a light water spray and apply with a brush, roller, pad or sprayer. Do not breathe vapors or mist or allow skin or eye contact. If sprayed, use extra caution and personal protective devices (See MSDS). Let the solution stand for 3-5 minutes, keeping the surface wet with a fine water mist if necessary, then brush with a short, stiff acrylic brush or deck broom. Add more product after initial brushing, let stand a second 3-5 minutes, brush again, then rinse well with maximum available household water pressure (or light pressure wash). For paints and solid body stains, full strength product may be required. For heavily worn stains and older oil and latex based sealers and finishes, dilution can be up to four (4) parts water to one (1) part ArroChem's DS&C. For general cleaning, a dilution of 20 to 1 is a good starting point.

\*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system
