## **RUBBER REJUVENATOR**

### **ROLLER REVITALIZER**

ARROCHEM'S Rubber Rejuvenator is specifically designed to clean oil-based, soy-based, and UV inks from printing rollers, blankets, and other printing equipment. Rubber Rejuvenator not only cleans ink from the surface of rollers, but it penetrates the rubber to remove ink from deep inside the pores. It revitalizes rollers by completely cleaning any remaining ink from previous press runs. Rubber Rejuvenator will swell rubber rollers, so proper application is important. Rubber Rejuvenator is a fast evaporating wash which leaves no residue behind.

#### General Characteristics:

Appearance:	Colorless Clear Fluid
Chemical Composition:	Aliphatic and Aromatic Solvent Blend
Solubility in Water, 25°C:	Not Soluble
Odor:	Acetate
pH, 1% solution:	Not Applicable
Foaming Nature:	None

#### APPLICATION:

For manual application, apply Rubber Rejuvenator with a rag or squirt bottle onto the equipment that needs cleaning. For rollers, allow rollers to turn to provide immediate evaporation of Rubber Rejuvenator. Typically, it is not necessary to continually reapply Rubber Rejuvenator during the same clean up. Do not overexpose rollers to this product.
