## TRAILER WASH CONCENTRATE

### CONCENTRATED ALKALINE TRUCKWASH

**ARROCHEM'S Trailer Wash Concentrate** is designed for cleaning and removing heavy oils, greases, and road buildup from tractor trailers and other road vehicles. It has high chelation ability to remove even the toughest road film. Used in conjunction with an acidic presoak such as ArroChem's Aluminum Brightener, products will not only clean a truck, but they will brighten the metal as well. Trailer Wash is highly economical since it is available in a concentrated form. Typical dilution through most pressure wash systems is at least 100:1. Unlike most conventional trailer washes, ArroChem's Trailer Wash is non-caustic which makes it a safer product for use on aluminum parts.

#### General

Appearance:	Clear Translucent Liquid
Chemical Composition:	Alkaline Solution
Solubility in Water, 25°C:	Readily Dispersible
pH, 1% solution:	12.0 ± 0.5
Wetting:	Rapid
Foaming Nature:	High

#### Application:

Trailer Wash Concentrate is formulated to offer high strength in an economical product. It can be used at concentrations between 100-200:1 in most pressure wash systems. It may be necessary to increase the strength for heavy buildup. Spray the surface to be cleaned with the product and allow it to penetrate before rinsing with water. As product is water-based, it should not be used at temperatures above 85°C (185°F) or below 5°C (40°F).

\*As conditions vary, all dosages and guidelines are merely suggested starting points; it is recommended the user determine the proper operating conditions for his/her system.
