BENZYL ALCOHOL

ArroChem's Benzyl Alcohol is an organic compound with the chemical formula C_7H_8O . It is a clear, colorless liquid with a mild, pleasant aroma. Benzyl Alcohol is widely used in various industries as a solvent, preservative, and intermediate in the production of various chemicals.

General Characteristics:

Appearance:	Clear, colorless liquid
WT% Benzyl Alcohol:	≥ 99.5
WT% Benzaldehyde:	$\leq .1$
Specific Gravity:	1.042-1.047 g/cm ³ at 25°C

APPLICATION:

Benzyl Alcohol finds diverse applications in various industries due to its versatile properties. Key applications include:

- **Flavors and Fragrances:** Employed as a flavoring agent and fragrance ingredient in the food and beverage industry.
- **Paints and Coatings:** Used as a solvent in paint and coating formulations.
- **Chemical Synthesis:** Serves as an intermediate in the synthesis of various chemicals, including benzyl acetate, benzyl benzoate, and benzyl chloride.
