BUTYL ACETATE

ArroChem's Butyl Acetate is an organic compound belonging to the family of esters. It is a colorless liquid with a fruity, sweet aroma and is commonly used as a solvent in various industrial applications, including paints, coatings, adhesives, and cleaning products.

General Characteristics:

Appearance:	Colorless liquid
Chemical Composition:	Butyl ester of acetic acid.
Solubility in Water, 25°C:	Slightly soluble; soluble with many organic solvents.
Flash Point:	24°C
Specific Gravity:	0.88 - 0.90 g/cm ³

APPLICATION:

Butyl Acetate finds a wide range of applications across industries due to its excellent solvency and low toxicity. Key applications include:

- **Paints and Coatings:** Used as a solvent in paints, varnishes, lacquers, and other coatings to improve flow and leveling.
- **Adhesives and Sealants:** Included in adhesive and sealant formulations to enhance performance and improve tack.
- **Cleaning Products:** Found in household and industrial cleaning products for its ability to dissolve and remove various substances.
- **Chemical Manufacturing:** Used as a reactant or solvent in chemical synthesis processes.
- **Printing Inks:** Used as a solvent in printing ink formulations.
