D'LIMONENE

ArroChem's D'Limonene is a natural, biodegradable solvent derived from citrus fruits, particularly oranges. It is a clear, colorless to pale yellow liquid with a pleasant citrus aroma. D'Limonene is widely used in various industrial and household applications due to its excellent solvency, low toxicity, and environmental-friendly properties.

General Characteristics:

Appearance:	Clear, colorless to pale yellow liquid
Chemical Composition:	Terpene
Solubility in Water, 25°C:	Insoluble
Flash Point:	~43°C (109°F) (closed cup)
Specific Gravity:	~0.839 – 0.845 g/cm ³ at 20°C (68°F)

APPLICATION:

D'Limonene finds diverse applications across different industries due to its unique characteristics. Key applications include:

- **Industrial Cleaning:** Used as a solvent in industrial degreasers, cleaners, and maintenance products.
- **Household Cleaning:** Found in household cleaners, including multi-purpose cleaners, carpet and upholstery cleaners, and floor cleaners.
- **Paint and Coating Industry:** Employed as a paint stripper and graffiti remover due to its ability to dissolve various coatings.
- **Fragrances:** Used as a natural fragrance in a variety of products.
- **Adhesives and Sealants:** Found in formulations to remove adhesives and sealants from surfaces.
