GLYCOL ETHER DB

ArroChem's Glycol Ether DB, also known as Butyl Carbitol, is a versatile organic solvent that belongs to the glycol ether family. It is a clear, colorless liquid with a mild, pleasant odor. Glycol Ether DB is widely used in various industrial applications, including paints and coatings, cleaning agents, inks, and as a coupling agent in chemical processes.

General Characteristics:

Appearance:	Clear, colorless liquid
Solubility in Water, 25°C:	Completely soluble
Specific Gravity:	~0.953 – 0.956 g/cm ³ at 20°C (68°F)
Ionic Nature:	Non-ionic
DB WT%:	≥ 99

APPLICATION:

Glycol Ether DB finds diverse applications across different industries, including but not limited to the following:

- **Paints and Coatings:** Used as a solvent in water-based and solvent-based paints and coatings, providing excellent film formation and flow properties.
- **Cleaning Agents:** Employed as an effective cleaning agent in household and industrial cleaning products due to its solvency power.
- **Inks:** Used in printing inks to dissolve colorants and improve ink flow during printing processes.
- **Chemical Processes:** Acts as a coupling agent and solvent in chemical reactions and formulations.
- **Industrial Applications:** Found in metal cleaners, surface coatings, and other industrial formulations.
