## GLYCOL ETHER DPM

ArroChem's Glycol Ether DPM is a clear, colorless liquid with a mild, ether-like odor. It is a member of the glycol ether family and serves as a versatile solvent in various industrial applications. The chemical formula of Glycol Ether DPM is C<sub>7</sub>H<sub>16</sub>O<sub>3</sub> (Dipropylene Glycol Methyl Ether).

### General Characteristics:

Appearance:	Clear, colorless liquid
Solubility in Water, 25°C:	Miscible with water
Specific Gravity:	~0.9490 - 0.9600 g/cm <sup>3</sup> at 25°C
pH, 1% Solution:	Neutral (pH close to 7)

### APPLICATION:

Glycol Ether DPM finds widespread applications across various industries, including but not limited to the following:

- **Coatings and Paints:** As a solvent for resins, dyes, and oils in the formulation of coatings, varnishes, and printing inks.
- **Cleaning Agents:** Used as an effective cleaning agent for industrial and commercial cleaning applications.
- **Adhesives:** Employed as a solvent in the formulation of adhesives, enhancing the bonding properties.
- **Chemical Processes:** Utilized as a reaction solvent and diluent in various chemical processes.
