## GLYCOL ETHER DPMA

ArroChem's Glycol Ether DPMA is a clear, colorless liquid with a mild, fruity odor. It is widely used as a powerful solvent in various industrial applications, with a moderate evaporation rate that provides good coalescing and viscosity control abilities.

### General Characteristics:

Appearance:	Clear, colorless liquid
Ionic Nature:	Non-ionic
Solubility in Water, 25°C:	Slightly soluble in water
Flash Point:	94°C (201°F) (closed cup)
Specific Gravity:	~0.965 g/cm <sup>3</sup> at 20°C

### APPLICATION:

Glycol Ether DPMA finds diverse applications across various industries, including but not limited to the following:

- **High-Solid Coatings:** Used as a solvent in high-solid coatings, providing efficient solvency and slower evaporation rates.
- **Specialty Inks:** Employed in the formulation of specialty inks, such as screen printing and gravure inks.
- **Cleaning Agents:** Utilized as a powerful solvent in industrial cleaning applications.
- **Chemical Processes:** Employed as a reaction solvent and diluent in various chemical processes.
