ISOPROPANOL 70%

ArroChem's Isopropanol 70%, also known as isopropyl alcohol 70%, is a clear, colorless liquid with a strong odor. It is a volatile and flammable chemical compound with the chemical formula C_3H_8O . It is widely used in various industrial, commercial, and household applications, including as a disinfectant, cleaning agent, and in first aid applications.

General Characteristics:

Appearance:	Clear, colorless liquid
Solubility in Water, 25°C:	Completely soluble
Flash Point:	~22°C (71.6°F) (closed cup)
Specific Gravity:	~0.854 – 0.874 g/cm ³ at 20°C (68°F)

APPLICATION:

Isopropanol 70% finds diverse applications across different industries and sectors, including but not limited to the following:

- **Cleaning Agent:** Found in household and industrial cleaning products for surfaces and equipment.
- **Electronics and Precision Cleaning:** Used for cleaning electronic components and precision equipment.
