## ISOPROPANOL 99%

ArroChem's Isopropanol 99%, also known as isopropyl alcohol, is a clear, colorless liquid with a strong odor. It is a volatile and flammable chemical compound with the chemical formula  $C_3H_8O$ . Isopropanol 99% is widely used in various industrial, commercial, and household applications, including as a solvent, disinfectant, and cleaning agent.

### General Characteristics:

Appearance:	Clear, colorless liquid
Solubility in Water, 25°C:	Completely soluble
Flash Point:	~11°C (52°F) (closed cup)
Specific Gravity:	~0.785 – 0.787 g/cm <sup>3</sup> at 20°C (68°F)
Ionic Nature:	Non-ionic

### APPLICATION:

Isopropanol 99% finds diverse applications across different industries, including but not limited to the following:

- **Solvent:** Used as a solvent in various applications, such as inks, coatings, adhesives, and chemical formulations.
- **Disinfectant:** Found in disinfectant solutions, antiseptics, and hand sanitizers due to its antimicrobial properties.
- **Cleaning Agent:** Employed as a cleaning agent in household and industrial cleaning products for surfaces and equipment.
