## LPA 210 SOLVENT

ArroChem's LPA 210 Solvent is a high-quality hydrocarbon-based solvent known for its excellent solvency power and versatility. It is a clear, colorless liquid with low odor, commonly used in industrial and commercial applications. LPA 210 Solvent exhibits strong cleaning and degreasing capabilities, making it suitable for a wide range of solvent applications.

### General Characteristics:

Appearance:	Clear, colorless liquid
Chemical Composition:	Proprietary blend of organic solvents
Ionic Nature:	Non-ionic
Solubility in Water, 25°C:	Insoluble
Flash Point:	Typically above 38°C (100°F)
Specific Gravity:	Typically around 0.75 - 0.78 g/cm <sup>3</sup>

### APPLICATION:

LPA 210 Solvent is utilized in a wide range of industrial applications, including:

- **Cleaning and Degreasing:** Used as a solvent in cleaning formulations to remove oil, grease, and contaminants from various surfaces and equipment.
- **Adhesives and Sealants:** Included in adhesive and sealant formulations to improve flow and adjust viscosity for optimal application properties.
- **Paints and Coatings:** Employed as a solvent in paint and coating formulations to enhance film formation and leveling properties.
- **Inks:** Incorporated in ink formulations to improve solvency and enhance ink performance.
- **Chemical Manufacturing:** Serves as a reaction medium and solvent in various chemical processes.
