MINERAL SPIRITS ODORLESS

ArroChem's Mineral Spirits Odorless is a hydrocarbon-based solvent that is derived from petroleum distillation. It is a high-quality, low-aromatic solvent specifically processed to have reduced odor and improved user experience. It is commonly used in applications where traditional mineral spirits may have a strong odor.

General Characteristics:

Appearance:	Clear, colorless liquid
Solubility in Water, 25°C:	Insoluble
Flash Point:	46°C (115°F) (Closed Cup)
Specific Gravity:	~0.750 – 0.770 at 15.6°C

APPLICATION:

Mineral Spirits Odorless is widely used in various industrial and commercial applications where low odor is essential. Key applications include:

- **Paints and Coatings:** Used as a thinner in oil-based paints, varnishes, enamels, and coatings without leaving strong odors.
- **Cleaning and Degreasing:** Employed for cleaning and degreasing metal surfaces, machinery, and equipment without imparting noticeable odors.
- **Adhesives and Sealants:** Used as a solvent in adhesives and sealants where low odor is desired.
- **Printing Industry:** Found in printing inks as a solvent and carrier for pigments without causing significant odor issues.
- **Rubber and Polymer Industry:** Used as a processing aid and solvent in rubber and polymer manufacturing, particularly in applications where odor is a concern.
