VM&P NAPTHA

ArroChem's VM&P Naptha is a versatile and fast-evaporating solvent widely used in industrial applications. It is a petroleum-derived solvent known for its strong solvency power and excellent cleaning properties.

General Characteristics:

Appearance:	Clear Liquid
Chemical Composition:	Hydrocarbon-based mixture
Solubility in Water, 25°C:	Insoluble
Flash Point:	Approx. -18°C (-0.4°F)
Specific Gravity:	0.74 - 0.78 (Approximate range at 25°C)

APPLICATION:

VM&P Naptha finds numerous applications across industries, including:

- **Paints and Coatings:** Used as a solvent in oil-based paints, varnishes, lacquers, and coatings to achieve proper viscosity and aid in application.
- **Cleaning Agent:** Serves as an effective degreaser and cleaner for machinery, tools, and surfaces.
- **Adhesives and Sealants:** Employed as a solvent for adhesive formulations, helping to dissolve resins and improve adhesion.
- **Thinning Agent:** Utilized to dilute and adjust the viscosity of various formulations.
- **Dry Cleaning:** Used as a solvent in dry cleaning processes.
